EDUCATION

University of Bologna

MSc (Laurea Magistrale) in Economics and Econometrics (LMEC)

Bologna, Italy
Sep 2026 – Jul 2028 (expected)

- Coursework: Econometric Methods, Microeconomics, Macroeconometrics; planned: Financial and Time Series Econometrics, Advanced Probability, Stochastic Processes

Bilkent University

BSc in Economics

Ankara, Turkey
2022 – 2026

- Honor Student, final semester (Spring 2026) · Focus: econometrics, time-series analysis

University of Mannheim

Erasmus exchange, Economics: Time Series Analysis, Statistics & Stata, International Finance

Mannheim, Germany
Feb – Jun 2025

EXPERIENCE

Bilkent University, Department of Economics

Research Assistant

Ankara, Turkey
Jul 2025 – Jun 2026

- Developed a signal-processing model for identifying common noise in stock-market data under the supervision of Dr. M. Taner Yiğit: shift-invariant MODWT (Symlet-22) decomposition of daily log-prices of S&P 500 constituents (CRSP, 2005–2024).
- Co-authored an econometric framework distinguishing idiosyncratic volatility from systemic noise; a market-wide noise factor from PCA on cross-sectional detail coefficients explains ~55% of cross-sectional variation.
- Tested whether the noise factor is priced using factor regressions, Fama–MacBeth cross-sections, quintile portfolio sorts and fixed-effects panels; extended to cointegration-based pairs trading on denoised prices.

VoyantAI

R&D Intern

Ankara, Turkey
Sep 2025 – Feb 2026

- Developed forecasting algorithms and models tailored to specific domains in the airline industry; built an algorithm for assessing the quality of fetched data.
- Created an AI agent for assessing econometric cases, contributing to the firm's AI-agent development procedure.

Bilkent University

Teaching Assistant, ECON 101 Introduction to Microeconomics

Ankara, Turkey
Fall 2024

PROJECTS

Currency Returns and Global Shocks: Does Bitcoin Act Like a Safe-Haven Currency?

Apr 2025

- With A. Krayoğlu and K. Hepdurak, University of Mannheim. Empirical study of Bitcoin, gold and currency returns under global risk shocks (Stata).

Segmentation and Machine Learning for the UK Housing Market

2025

- With A. Krayoğlu. 180,000+ UK Land Registry transactions (2015–2025); K-means segmentation and random-forest valuation for an investment-strategy case; location explains over 70% of price variation.

Automated Market-Monitoring Pipeline (personal)

2026

- Python threshold monitoring of FX, rates and equity volatility (USD/TRY, EUR/TRY, VIX, S&P 500, BIST 100, US 10Y) with central-bank calendar alerts and an agentic news-synthesis briefing delivered on a weekday schedule.

SKILLS

- Programming:** Python (pandas, NumPy, statsmodels, linearmodels), R, Stata, MATLAB, Java; $\LaTeX$, Git; LLM agent workflows (Claude Code, API)
- Methods:** time-series and panel econometrics, factor models, PCA, wavelet signal processing, forecasting, HAC and bootstrap inference
- Languages:** Turkish (native), English (full academic proficiency), Italian (limited proficiency)

AWARDS AND ACTIVITIES

- Interdisciplinary Senior Thesis Award, Bilkent University
Feb 2026
- President, Bilkent University Economics Research Union
Jan 2023 – Feb 2025
- Nesin Mathematics Village: linear algebra, probability, real analysis
2019 – 2022
- Bronze, Duke of Edinburgh's International Award (2021) · 3rd place, FIRST LEGO League Istanbul Finals (2017)
